

## GROOMING/ BATHING AGREEMENT

Grooming your pet at Four Seasons Animal Hospital is a service we are glad to provide for our clients. We must keep in mind that this facility is an Animal Hospital that provides grooming services. While sick animals are isolated from pets being groomed, we require the following preventative medicine measures to be current to protect your pet from infectious diseases:

### Required Vaccinations:

- DOGS: Rabies vaccine (1 year or 3 year)  
DHPP (Distemper, Hepatitis, Parainfluenza, Parvovirus)  
Bordetella bronchiseptica (Kennel Cough)
- CATS: Rabies vaccine (1 year or 3 year)  
FVRCP (Feline Viral Rhinotracheitis, Calicivirus, Panleukopenia)
- FERRETS: Rabies vaccine

**Additional Recommended Vaccinations:** Dogs that come in contact with a large number of other dogs (boarding, grooming, dog parks, etc.) are more susceptible to upper respiratory infections. These vaccines can help prevent/ lessen the signs of these contagious diseases and are highly recommended.

DOGS: H3N2 (Influenza vaccine)

- I am declining the recommended vaccine and understand that if my pet should contract this disease, I will be responsible for any additional charges accrued for exams and medications.

Please initial \_\_\_\_\_

**External Parasites:** Fleas are contagious parasites! During grooming, should any fleas be found, your pet will be medicated at your expense.

If your pet has not been vaccinated at our facility, we will require current vaccination records on file prior to your pet being groomed. Should you not bring your pet's vaccination records, we will make all attempts to contact the facility where your pet was vaccinated.

**If current vaccination records cannot be obtained, we will vaccinate your pet at your expense.**
